Civil engineering surrounds the world in which we live. Most people take advantage of civil engineering services without giving a second thought about it. The truth is, without it, society would not function as it does. If you've driven on an onramp to a highway and you didn't fly off, a civil engineer designed that.

A material take off (MTO) is the process of analyzing the drawings and determining all the materials required to accomplish the design. Thereafter, the material take off is used to create a bill of materials (BOM). Inspection does not aid in creating a bill of materials. Procurement and requisition are activities that occur after the bill of materials is complete.
