The study of global communication is an interdisciplinary field focusing on global communication, or the ways that people connect, share, relate and mobilize across geographic, political, economic, social and cultural divides.

Study of global communication - Wikipedia

The New World Information and Communication Order (NWICO or NWIO) is a term coined in a debate over media representations of the developing world in UNESCO in the late 1970s early 1980s. The NWICO movement was part of a broader effort to formally tackle global economic inequality that was viewed as a legacy of imperialism upon the global south. The term was widely used by the MacBride ...

The Digital Divide, ICT, and Broadband
Internet ICT - Information

Communications Technologies. The
Digital Divide, or the digital split, is a
social issue referring to the differing
amount of information between those
who have access to the Internet
(specially broadband access) and those
who do not have access.

Digital Divide - ICT Information Communications Technology

Download Ebook Global Information And World Communication New Frontiers International Relations 2nd Edition

Information and communications technology (ICT) is an extensional term for information technology (IT) that stresses the role of unified communications and the integration of telecommunications (telephone lines and wireless signals) and computers, as well as necessary enterprise software, middleware, storage, and audiovisual systems, that enable users to access, store, transmit, and manipulate information.
