and angular) or curved lines (grid lines) used to structure content.

Grid (graphic design) - Wikipedia

The grid system used in the graphic design process is a way of organizing content on a page. It uses any combination of margins, guides, rows, and columns to form a uniform arrangement. It is most apparent in newspaper and magazine layouts with columns of text and images, though designers use it in many other projects, too.

How to Use the Grid System in Graphic Design

The foremost purpose of a grid – in graphic design at least – is to establish a set of guidelines for how elements should be positioned within a layout. Not only does an effective grid provide the rhythm for a design, but it also defines the meter.

of design, Grid Systems in Graphic Design: A Visual Communication Manual for Graphic Designers, Typographers and Three Dimensional Designers was the first text of its kind to establish design principles based on organized grid systems.

Principles of Design: Bringing Order to Chaos with Grid ...

If nothing else, grids and type are two design elements that very happily go hand in hand. A strong grid can help make type-heavy layouts appear neater, more organized, and can help to enhance the legibility and readability of body copy. One way grids help enhance the legibility of your type is through something called the 'baseline grid'.

Grid Systems Graphic Design - AbeBooks

Although grid systems are the foundation for almost all typographic design, they are often associated with rigid, formulaic solutions. However, the belief that all great design is nonetheless based on grid systems (even if only subverted ones) suggests that few designers truly understand the complexities and potential riches of grid composition.
